TRANSFORM YOUR CONSTRUCTION BUSINESS
Your Must-Have IT Checklist

☐ **Data Security and Compliance**

  ☐ **Do you have up-to-date security protocols in place** (e.g., encryption, multi-factor authentication)?

  ☐ **Are you conducting regular security audits?**

☐ **Develop Incident Response Procedures**

  ☐ **Breach Response and Notification Procedures:** Do you have a documented response plan for data breaches? How will you continue to operate?

☐ **Have the Right Equipment for the Job**

  ☐ **Optimize Workstations and Servers:** Are your servers and workstations optimized for the software you use? Running BlueBeam, AutoCAD, ProContractor, and many other applications for your industry can be taxing on your IT equipment. Are you losing time each day because of incompatible or slow PCs, servers, and tablets?

☐ **Cloud Computing and Storage**

  ☐ **Choose Cloud Providers:** Select scalable cloud services such as Microsoft Azure, Google Cloud, or AWS that offer tools tailored to the construction industry.

  ☐ **Access your files anywhere:** Ensure that cloud solutions facilitate easy access to data and applications from anywhere, supporting field work and collaboration.

☐ **Employee Training**

  ☐ **Provide Training:** Train employees on the importance of protecting consumer information and the specifics of your security program.

  ☐ **Regular Updates:** Conduct ongoing training and updates to address new threats and security practices.

☐ **Consult with Experts**

  ☐ **Professional Guidance:** Are you leveraging expert advice to ensure full compliance?
