

UNLOCK YOUR MANUFACTURING POTENTIAL

Your Must-Have IT Checklist

☐

Data Security and Compliance

☐

Do you have up-to-date security protocols in place (e.g., encryption, multi-factor authentication)?

☐

Are you conducting regular security audits?

☐

Develop Incident Response Procedures

☐

Breach Response and Notification Procedures: Do you have a documented response plan for data breaches? How will you continue to operate?

☐

Implement an ERP System

☐

Ensure you have a comprehensive Enterprise Resource Planning (ERP) system in place to streamline operations. Look for features like real-time data analytics, supply chain management, and integration with existing systems.

☐

Adopt IoT Solutions

☐

Implement Internet of Things (IoT) technologies to monitor equipment performance and track production metrics. Verify that your IoT solutions are secure, scalable, and compatible with current infrastructure.

☐

Cloud Computing and Storage

☐

Choose Cloud Providers: Select scalable cloud services such as Microsoft Azure, Google Cloud, or AWS that offer tools tailored to the construction industry.

☐

Access your files anywhere: Ensure that cloud solutions facilitate easy access to data and applications from anywhere, supporting field work and collaboration.

☐

Employee Training

☐

Provide Training: Train employees on the importance of protecting consumer information and the specifics of your security program.

☐

Regular Updates: Conduct ongoing training and updates to address new threats and security practices.

☐

Consult with Experts

☐

Professional Guidance: Are you leveraging expert advice to ensure full compliance?
